

Ilyass Agnaou

Cybersecurity Engineer — Student in Cybersecurity and Digital Trust
agnaouilyas4@gmail.com | +212 649 605 084 | LinkedIn | GitHub | Credly

PROFILE

Cybersecurity-focused Computer Engineering student with a strong passion for designing secure systems, vulnerability detection, and network defense. Experienced in IDS/IPS technologies, network hardening, and system security. Motivated to contribute to innovative cybersecurity projects and protect digital infrastructures.

EDUCATION

Cycle d'Ingénieur, ENSET – Université Hassan II *Sep 2023 – Jul 2026*
Specialization: Cybersecurity and Digital Trust

CPGE Technologie et Sciences Industrielles, CPGE Salmane El Farissi *Sep 2021 – Jul 2023*
Preparatory Classes for Engineering Schools (TSI)

WORK EXPERIENCE

Intern – Cloud Security Architecture, Barid Al Maghrib (Rabat) *Jul 2025 – Sep 2025*

- Designed and implemented a cloud security architecture for the organization's hosting services.
- Built and documented three architectures:
 - Backup VM Hosting:** secure and isolated backup environment.
 - Web/App Hosting:** segmented architecture with security layers for application exposure.
 - Bastion Hosting:** controlled access point with strict authentication and monitoring.
- Integrated firewalling, access control, and network monitoring for compliance and protection.

Intern – Cybersecurity, DGAPR (Rabat) *Aug 2024 – Sep 2024*

- Developed an Intrusion Detection and Prevention System (IDS/IPS) to detect, analyze, and block cyber threats.
- Implemented network security measures: firewall configuration, access controls, and monitoring tools.

PROJECTS

Web Application for Managing Security Logs (BLADE)

Real-time insider threat behavior analysis and prediction based on Linux system logs using Python, Streamlit, and Jupyter Notebooks.

Penetration Testing Tool

Developed an automated Python/Scapy tool for network scanning and vulnerability detection.

Defensive Cybersecurity Lab

Implemented a segmented lab using pfSense and TinyCore Linux to simulate enterprise defense and access control.

SKILLS

Technical: C/C++, Java, Python, JavaScript, Linux, Docker, Git/GitHub, Wireshark, Cloud Security, AI/ML

Cybersecurity: IDS/IPS, Threat Management, Network Hardening, Firewalls, Access Controls

Languages: Arabic (Native), English (Fluent), French (Fluent)
